Mines and Mining Stocks

DPENS NEW MINE IN RAYMOND ELY TOUGH ON EXPERTS SHIPS BROUTETES Confirmation of the inverse principle of the ship of

the great bodies of the same kind of ore have been opened in the Susan Duster and Greenwood mines, more than 1,200 feet away.

In the old worklow of the same kind of ore the great bodies of the great

In the old workings of the Raymon Ely section the drifts on every level wer run to the quartzite-shale contact, leavin the great mineral zore on the shale side unexplored. The new disclosure mean multiplying several times the produc-tive area of the old portion of the camp

Last Quarter's Production Was Made From Section Not Before Counted Upon.

A feature of Utah Copper's production for the third quarter of the year, which means virtually the doubling of that company's "in sight" resources, while it was covered in the executive committee's report of that quarter's operations, was for some reason overlooked in the pressummaries sent out from the east. It is that the production for the three months, which fell only a trifle below the record output for the previous quarter, was made largely from a section of the company's porphyry deposit which averages only 1.5 per cent copper—a section which has not been included in the estimates of ore tonnage made by the company in the past. And a profit of \$1 a ton was made on that ore, which is much below the average grade of the mine.

Discussing this remarkable performance, the current copper letter of George L. Walker of the Boston Commercial says: was covered in the executive committee's

"Including its 1.5 per cent ores and about 12,000,000 tons placed in sight by its stripping operations this year, which was previously not known to exist, it is was previously not known to exist, it is now estimated that the property contains approximately 129,000,000 tons of ore, which will yield a profit of \$1.25 to \$1.75 a ton on a 13½ c copper market, or a total of approximately \$150,000,000 to \$175,000,000. The company's capital stock is selling for a little over \$40,000,000, and the current net earnings are at the rate of 7 per cent on the market price.

"I understand that Utah Copper is now moving 20,000 tons of material daily, of which 7,000 tons is ore which goes to the concentrator and the remainder is surface capping, which is being stripped off in proportion for the extension of the steam shovel mining.

Magnitude Not Realized.

Magnitude Not Realized.

Tew people realize or appreciate the magnitude of this company's operations and the systematic method in which the work is being carried forward. From the beginning of operations the management has been looking far ahead and working has been looking far ahead and working out plans for a steadily increasing volume of production, the objective being an ultimate output of 10,000 tons of ore daily and a production of 90,000,000 or more pounds of copper annually. "With an output of 10,000 tons a day, it would require thirty-four years to exhaust the property's probable ore reserves, and in the meantime the company would earn between \$6 and \$9 a share annually on its stock, with the

pany would earn between \$6 and \$9 a share annually on its stock, with the price of copper varying between 13c and 15c, or a total of \$200 to \$225 a share.

"If Utah Copper takes over Boston Consolidated—and those in position to know say that it undoubtedly will—the combined company will possess approximately 180,000,000 tons of ore, which should yield an average of at least \$1.25 a ton, or \$225,000,000. The consolidated company will probably have a capitalization of 1,100,000 shares, which, at \$60, will have a market valuation of \$66,000, equivalent to about 30 cents on the dollar of prospective ultimate profits. dollar of prospective ultimate profits.
"Notwithstanding the considerable ad vance of Utah Copper stock in the last year or two, it would seem that it is yet cheap, whether viewing it from a specu-

Breeden Office SupplyCo 60 West Second South.

The ability of William Lloyd, the vettern Pioche mining man, to find ore where no one else would think of looking for it is proverbial in the camp. But, with nothing to guide him save his general knowledge of the district's normation, he has just recorded in the old Raymond Ely workings of the Ploche Consolidated Mining company a strike which doubtless cellpass all of his previous accomplishments in that line, for it is regarded as likely te prove the most important strike ever made in Ploche. When Mr. Lloyd was placed in charge of work recently started by the new company, which had long for working with the case of work recently started by the new company, which had long pleen in conflict, he acted as though he knew right where to go to open some reare that the mineralized has cut at least 20 feet of soil sulphing or carrying good sliver, lead and zinc values. Some of the ore runs as high as go countered and a survey and the month of the great contact—which the country south of the great contact—which the concerning south of the great c

cite coal.

The plant in use at Coalville was removed there by Mr. Durkee from Kansas City, where it was a success in so far as the making of briquettes was concerned, but where their manufacture became non-profitable on account of the competition of natural gas.

The Coalville works represent an investment of \$250,000 A force of 76 men is ment of \$250,000. A force of 76 men is employed in mine and plant, with only 10 men required to operate the briquette making machinery. Similar plants are is successful operation at Hartshorn, Okla. and Detroit, Mich., but the Coalville pian is said to be the best in the United States

U. S. SMELTER EARNINGS.

Improvement Charges Will Reduce Early Estimates.

Boston, Dec. 13.—Present indications point to net earnings for the United States Smelting, Refining & Mining company for the year to end December 31, after depreciation, fixed charges, etc., are deducted, of about \$3,600,000, or an average of \$300,000 per month for the en-

Such earnings would be equal to 7 per cent on the preferred stock (par \$50) and 10 per cent or \$5 per share on the common stock. Two dollars per share is now paid on the common stock. For several months last summer net earnings were at the rate of \$550,000 a month, or on a basis of \$8 a share per annum for the common stock.

During the last few months however.

common stock.

During the last few months, however, there have been rather heavy charges out of earnings to depreciation and renewals, particularly in Mexico, where improvements are being made out of earnings to the big mills of the Real del Monte company, and hence the net has been temporarily reduced to around \$300,000 around.

The management of the United States Smelting, Refining & Mining company is paying particular attention to the upkeet of its plants, and the expense of this upkeep is a direct charge against earn ings.
With silver at 50 cents an ounce, copper at 13 cents a pound and low prices for other metals, the company has shown ability to earn at the rate of \$8 a share per annum for the common stock.

START DEEP TUNNEL IN GOLCONDA OLD MINES

Rehabilitation of the old White & Sailoh and Trinity mines, near Battle Mountain. Nevada, has been inaugurated by the Golconda Mines company, of Paris and London, by starting the work of driving a 2,300-foot tunnel, which will afford permanent draining and remained. ford permanent drainage and permit of sinking the White & Shiloh shaft to much greater depth. Fourteen tons of track and rail for the new tunnel are on the way. The properties were all large pro-ducers under primitive methods of min ing and the work just started is expected to make them much more than duplicate their former records.

MONARCH IN CONTACT: EXPECTS BIG RESULTS

The drift on the 80-foot level of the Seven Troughs Monarch company's workings has cut the contact 38 feet from the shaft, according to advices received yesterday from camp. Good looking quartz has been found on the contact, which will be prospected both ways. That gratifying results will accompany that work is confidently anticipated.

Ore and Bullion.

Smelter settlements yesterday, reported by McCornick & Co.: Ores,
580.690; bullion, \$60,000.
Silver was quoted at 52%c; copper,
\$50,000; bullion, \$60,000.

******** Ore at Samplers.

Ore receipts, by carloads, reported yesterday by the Utah Ore Sampling company: Utah, 14; Nevada, 2.

HOTELS AND RESORTS.

foot level and has been followed down by inclined shaft to a depth of eighty feet, where water was reached. At this time it is impossible to tell either the width or length of this deposit, but a force of men will be put to work at once to determine it. It would hardly require a smelter to treat-the ore already encountered; it is more of a shipping grade.

Ore Bodies Wider at Depth.

"The ore bodies appear to me to be widening with depth, and in my opinion the Mason Valley property is the making of one of the largest copper mines in the world. My associates believe that the management has been too conservative in its description of the extent and value of the deposits. With the completion of a smelter, which will be more than likely at an early date, the mine is destined to turn out as much wealth as any ore body ever opened."

Walter B. Farmer, who has been prominent in promoting the Utah Metal Mining company, which has taken over the Bingham Central Standard and Bingham Metal companies, arrived in the city yesterday from the east to look after the inaugurating of extensive operations by the new company.

Dean F. Brayton, Attorney for Peti-

John R. Cook, manager of the Mendha mine at Pioche, and one of the large owners of the Gold chief, arrived in the city yesterday from camp. The Mendha is making its usual production, and extending development with excellent results, Mr. Cook says, while the Gold Chief is pushing arrangements for large production.

J. S. Free left last night for Pioche to look after mining interests in the big lead-silver camp.

P. J. Quealy of the Gunn-Quealy syndicate arrived in the city yesterday from the east.

TIN THE DISTRICT COURT, PRObate division, in and for Salt Lake county, state of Utah.
